
COPYRIGHT, PUBLISHING AND YOUR ELECTRONIC THESIS OR DISSERTATION (ETD)

Office of Graduate and Professional Studies, Thesis and Dissertation Services

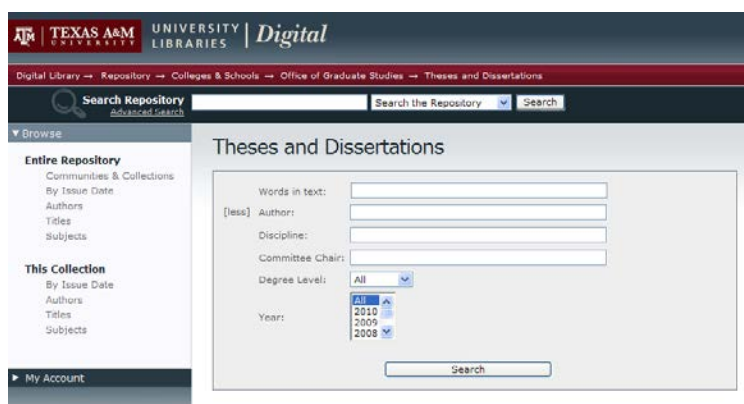

Copyright for your thesis/dissertation

Your thesis or dissertation is automatically copyrighted under U.S. Federal Law (United States Code, Title 17) as soon as you save a draft of it on paper or computer. You do not need to apply for this protection, and it lasts for the span of your lifetime plus 70 years. You retain the right to your work until, or unless, you transfer it to another party (for example, a publisher or media producer). Only you – the copyright owner -- can choose whether, how or when to transfer the copyright in your ETD.

When you submit your ETD to the Texas A&M Repository, you are asked to sign a non-exclusive, perpetual license that allows the University and the Texas Digital Library to make your work freely available on the World Wide Web, and to transform the work into other formats if needed for preservation or access in the future.

This license does not affect your copyright in the work, or prevent you from licensing your work to other parties. Doctoral candidates who submit their dissertations to ProQuest also sign a non-exclusive license allowing that company to reproduce, sell, and archive the ETD in their facilities.

You are not required to include a copyright notice on your ETD, but doing so is good practice for several reasons. It informs the public that the work is protected by copyright; identifies the copyright owner; and shows the year of first publication. The proper format for a copyright notice is © (the letter C in a circle), or the word "Copyright"; the year of first publication; and the name of the copyright owner; for example: Copyright 2010 Susan Student. Including a copyright notice on your ETD is also a good idea if you plan to attach a license (such as a Creative Commons license), allowing certain uses automatically without your permission.

Using other's copyrighted material

If you plan to include in your dissertation/thesis other's copyrighted work, such as charts, drawings, photographs, computer programs, music, etc., you have the responsibility to determine whether your intended use qualifies for the Fair Use provision of US copyright law. Fair Use stipulates that certain uses of copyrighted material, under certain conditions, are not an infringement. Limited use of copyrighted material for the purpose of criticism, comment, news reporting, teaching, and scholarship are commonly considered to be Fair Use. Guidance for making a Fair Use evaluation can be found in the free booklet *Copyright Law & Graduate Research: New Media, New Rights, and Your New Dissertation*. Online, URL: <http://www.umi.com/en-US/products/dissertations/copyright/>. If your intended use is Fair, you do not need permission.

If your intended use of copyrighted material does not meet the Fair Use standard, you must secure written permission from the copyright holder. In this instance, an extra copy of a permission letter (or an email) must be provided to the Thesis Office.

Whether or not permission is needed, proper attribution to the source must be given in the text and references section of your dissertation/thesis.

Registering copyright in your thesis/dissertation

Registration of a thesis or dissertation with the US Copyright Office is not required, and doing so does not change the copyright status of the work.

Registration is, however, necessary before you can bring a lawsuit to enforce your copyright. Any work may be registered directly with the US Copyright Office for a small fee. As explained on the Copyright Office website (<http://www.copyright.gov/register/>)

the entire process can be readily completed online. Doctoral candidates who wish to copyright their work may also do so through ProQuest for an additional fee.

Information about this is available through the Thesis Office website. Copyright registration arrangements and payment must be made at the time the manuscript is submitted electronically to the Thesis Office.

Thinking about publishing?

When publishing your work, be aware of the agreement you sign when a publisher accepts your article or book for publication. You may be asked to transfer your copyright over to the publisher as a condition of publication. In doing so, you may lose the right to use this material without permission. If you subsequently wish to use the work in your thesis/dissertation, you would have to request permission from the publisher.

However, you can *modify* the publishing agreement before you sign it to avoid this problem. Most importantly, you can retain the right to include the published material in your thesis or dissertation. The publisher would still have the right to print, distribute, and sell the work.

When negotiating with publishers, remember to inform them that your thesis/dissertation will be available worldwide through the Internet as part of the Texas A&M Digital Repository. All Texas A&M dissertations will also be available for purchase through ProQuest. Publishers consider these scenarios on a case-by-case basis, with most

unconcerned about University or ProQuest distribution. For those cases where publishers are concerned with prior Web dissemination, an option to restrict access for a period of time may be applied both by Texas A&M and by ProQuest.

If you have already published material that you would like to include in your thesis, chances are you signed away your copyright to the journal. If that is the case, you can still use this information in your thesis, as long as you have written permission from the publisher and give them proper acknowledgement in the text.

Read the agreement you signed with the publisher to see if you retained any rights to republish the material.

If you did not retain the right to reuse material in your thesis, contact the publisher and get written permission to reprint the previously published material.

The Thesis Office requires copies of all permission letters before clearing a manuscript. We will accept letters, faxes, or emails giving permission to republish. You can download a sample permission request from the Thesis Office website.

Important things to remember

Before you sign an agreement:

- Read all information carefully.
- Make sure you understand and agree with all terms and conditions.
- Make any changes or add any addendums that will protect your ownership of the copyright.

When using previously published material in your thesis/dissertation:

- Read over the agreement you signed, to verify who retains the copyright.
- Contact the publisher, and ask for a written request to include published material in your thesis/dissertation.
- Give the Thesis Office copies of all permission letters received from publishers.
- Give the publisher proper acknowledgement in the text.
