

## Pages with a Figure and a Table

### 3. PAGES WITH A FIGURE AND A TABLE

#### 3.1 Figure Placement and Size

Figures need to be within the set text margins and be large enough to read (1.5 mm or about 7 pt type). You need spacing above and below the figure or table that is more than the spacing of the text. At least a triple (or three single) spaces is needed. Figures do not need to have the same size or style of type in them.

#### 3.2 Figure Titles

The style of the figure titles needs to be consistent for all the figures. This includes bold or not, italics, abbreviations, (Fig. 1 vs Figure 1, for instance), vertical spacing, flush or centered on the page. This does *not* include type size and style, which can vary from figure to figure. See Figure 1 caption for information on figure numbering and spacing.

**Figure 1.** The figures can be numbered consecutively throughout the thesis (1, 2, 3, 4, etc) or numbered by chapter (1-1, 1-2, 2-1, etc.). (A) Each figure should be referred to by that number within the text, within 1 ½ pages of the figure. (B) The figures can be put on a separate page from the text, but if they are incorporated into the text, they must be offset by at least a triple space above and below. (C) Figures must fit within the normal page margins. Figure captions are not considered regular text, and so may be a different font size and may be single spaced. Each figure must have a unique caption, and captions, up to the first period, must be included in the List of Figures.
